BILL MCKIBBEN

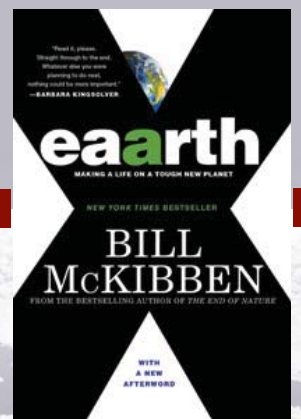

“the planet’s best green journalist”
-*Time Magazine*

*“probably the country’s most
important environmentalist”*
-*Boston Globe*

Bill McKibben is a co-founder and global organizer of 350.org. He is an American environmentalist and writer who frequently writes about global warming, alternative energy, and the risks associated with human genetic engineering. A scholar-in-residence at Middlebury College, McKibben is the author of The End of Nature, the first book for a general audience on climate change, and Eaarth, a portrait of life on our heavily-modified world.
